

# Experimental Cloud Using Commodity Hardware

*A Project Report Submitted  
in Partial Fulfillment of the Requirements  
for the Degree of*

**Bachelor of Technology**

*by*

**Kaushal Kishore**  
(111601008)

*under the guidance of*

**Dr. Sandeep Chandran**

INDIAN INSTITUTE  
OF TECHNOLOGY  
**PALAKKAD**

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING**

# CERTIFICATE

*This is to certify that the work contained in this thesis entitled “**Experimental Cloud Using Commodity Hardware**” is a bonafide work of **Kaushal Kishore (Roll No. 111601008)**, carried out in the Department of Computer Science and Engineering, Indian Institute of Technology Palakkad under my supervision and that it has not been submitted elsewhere for a degree.*

**Dr. Sandeep Chandran**

Assistant Professor

Department of Computer Science & Engineering

Indian Institute of Technology Palakkad

# Chapter 1

## Introduction

Write introduction.

### 1.1 Section name

1st Section

### 1.2 2nd Section name

2nd Section

### 1.3 Organization of The Report

You can write the about organization of your report in the following manner.

This chapter provides a background for the topics covered in this report. We provided a description of wireless ad hoc networks, and their applications. Then we described the network model that represents the topology of wireless ad hoc networks [1]. In this chapter it is shown that the virtual backbone for wireless ad hoc networks can be represented by a connected dominating set. We explained clustering concepts and lastly the difference

between centralized and distributed algorithms are also discussed. The rest of the chapters are organised as follows: next chapter we provide review of prior works. In Chapter 3 and 4, we discuss our new algorithms for constructing small backbones for ad-hoc wireless network. And finally in chapter 6, we conclude with some future works.

# Chapter 2

## Review of Prior Works

Survey comes hear

### 2.1 Section name

write ....

### 2.2 Conclusion

This chapter provided details of the some of the existing distributed algorithms for constructing a CDS in wireless ad-hoc networks. The results of these evaluations are summarized in table ?? . In next chapter, we discuss our distributed Algorithm I, for constructing a small backbone in ad-hoc wireless network.

# Chapter 3

## Algorithm I

give details of your algorithm

### 3.1 Conclusion

In this chapter, we proposed a distributed algorithm for construction of xyz. The complexity of this algorithm is  $O(n \log n)$ . Next chapter presents another distributed algorithm which has linear time complexity based on xyz.

# Chapter 4

## Algorithm II

The algorithm presented in previous chapter has  $O(n)$  time complexity. We further propose another distributed algorithm in this chapter based on xyz which has linear time complexity.

### 4.1 Construction

Write ...

### 4.2 Improved Method

Write...

### 4.3 Conclusion

In this chapter, we proposed another distributed algorithm for XYZ. This algorithm has both time complexity of  $O(n)$  where  $n$  is the total number of nodes. In next chapter, we conclude and discuss some of the future aspects.

# Chapter 5

## Conclusion and Future Work

write results of your thesis and future work.
